Assured Data Sheets are not the same as Agreement Certificates. They relate to non-critical products for which there are generally no statutory requirements, and continuing surveillance of the production facility is not undertaken. Readers are advised to check the validity of this Assured Data Sheet by contacting the BBA (Telephone Hotline 01923 665400).

Use
Fingersafe is available in two versions. The MK1A is designed to act as cover for the gap created between a frame stop and a door hinge edge when the door is opened and comprises a fixing strip and a pleated guard. The MK1B is designed to act as a cover for the gap created between the door frame and the door leaf on the hinge pin side when the door is closing. Both are attached using steel screws.

Product description
Fingersafe is a finger safety device for hinged doors, made from PVC-U and TPE (Thermoplastic Elastomer) material. The products are available in kit form to suit doors up to 2032 mm high, but are also available, to order, in any lengths.

In issuing this Assured Data Sheet, the BBA does not accept responsibility to any person or body for any loss or damage, including personal injury, arising as a direct or indirect result of the use of these products.

Date: 22nd April 2002
Chief Executive

On behalf of the BBA

Technical opinion
In the opinion of the BBA, Fingersafe installed in accordance with the manufacturer's instructions is satisfactory as a finger safety device for hinged doors, and will have a satisfactory life.

The opinions given apply to the product as assessed by the BBA under the contract leading to the issue of this Assured Data Sheet.

An assessment was carried out to determine the ease of installation and performance in use.

Data

Fingersafe, when installed on the hinge side of the door, will protect fingers and hands from entrapment.
